[A sentence that states the main finding, in plain words]

[First Author][1], [Second Author][2]
[1][Department, University, City] · [2][Organization, City]

[Orienting picture]

→ [First key result, with its number]
→ [Second key result]
→ [What it means, or what comes next]

[The question, and why it matters, in one sentence]

[Two or three sentences a non-specialist can follow: the problem, the gap, and what this work tried.]

[Figure that shows the problem]

[What to notice in this figure.]

[What was done, stated as a result where possible]

[The method in a few sentences; the details go behind the QR code.]

[Set-up or method diagram]

[Call out the parts that matter.]

[The main result, as a sentence with its number]

[The largest figure: the evidence]

[Axes, units, and what the reader should see.]

[What the result means, or what comes next]

[One short paragraph. End with the next step or an invitation to talk.]

[Paper, data and code]
